

Overview:

SupplyOn partnerships with Electronic Commerce Solutions (ECS) International BV as the main Business Partner EMEA for CLEO Inc. to provide the CLEO LexiCom communication client as a fully tested and integrated software to connect to the **SupplyOn M2M** platform for EDI-XML integrations. The CLEO LexiCom software is pre-configured for the necessary connectivity settings.

Product & Pricing – **For actual price details, contact ECS at: salesecs@ecs-europe.com !!**

CLEO LexiCom is high quality Drummond-certified communication software product supporting all global communication protocols such as AS2, AS3, OFTP/2, SFTP, ebMS and others. CLEO LexiCom includes pre-configured SupplyOn AS2 settings for TEST and PRODUCTION. The product and support fees for a Windows platform 1TP AS2 connection are:

- Euro ***** (list price one time licence fee, purchased directly by the supplier from ECS)
- Euro ***** (annual Support/Helpline support fee, purchased directly by the supplier from ECS)

We **STRONGLY** advise the suppliers to license an additional AS2 connection to have always a TEST and PRODUCTION AS2 connection available to Company ABC. (Trading Partner can choose for a 2nd LexiCom 1TP license on a separate TEST machine, or a 2nd AS2 Connection on the primary LexiCom license. Pricing for a **2nd AS2 TP or 2nd LexiCom 1TP TEST is € ******* plus additional Support fee of € ***** p/year.

Also we **STRONGLY** advise LINUX or UNIX LexiCom users to license the separate WebGui module for fast & easy set-up and implementation. The additional WebGui module is priced at € ***** plus a yearly OGS/Support fee of € *****. This pricing is guaranteed until end of 2014.

Secure Certificate costs for the required SupplyOn certificate-based AS2 authentication will occur additionally on the Trading partner side by purchasing trusted certificates from the recommended Trusted Certificate Authorities. Please refer to the SupplyOn Integration Implementation Guides regarding certificate requirements.

Implementation & Testing Service and Pricing:

ECS Int. provides a 'ready to communicate' implementation service solution, **Sponsored by SupplyOn!**

ECS provides the following Implementation & Testing Service as a default service for each Windows Based CLEO LexiCom communication client software purchase. For more complex implementations on platforms as UNIX, LINUX and iSeries, ECS will charge the Linux/Unix/iSeries users additional € 200,- implementation-Setup fee per implementation, (SupplyOn will sponsor the rest of the amount on your behalf):

Services provided include:

- Set-up and implement (via a 'remote' connection to your server) all the required settings so that you will be ready to exchange test messages via the AS2-TEST connection with company ABC via self-signed certificates.
- Remote assist with the Import and LexiCom settings for Signed / Trusted certificates for PRODUCTION.
- After successful testing, ECS will finalize and test the implementation with all settings for the AS2 PRODUCTION connection with SupplyOn – in order to go LIVE!

SupplyOn will "Sponsor" for the implementation/testing service provided by ECS on your request !!

- This sponsoring is handled directly between SupplyOn and ECS. You can opt-out not to use this service.

More technical setup documentation and details on licensing, pricing and services can be found on the ECS website: <http://www.ecs-europe.com> > **Clients > SupplyOn**. When you prefer 'on site' implementation services, please contact ECS using the contact information below. All prices do not include any applicable VAT/Tax.
