

Cleo Jetsonic™

When your business-critical data absolutely, positively has to get there now

Business runs on data. And as more and more business processes become digitized, there is more and more data to keep moving. File sizes are getting larger. Yet most company's current infrastructure to move larger files within their company or beyond — to partners, customers, and suppliers — is not up to the task.

Cleo Jetsonic™ has been specifically designed to quickly, easily, and securely move extremely large files. This cutting-edge technology works by more optimally using your network bandwidth and existing infrastructure to move data several multiples faster. The result is highly reliable file transfers that are much faster than leading competitors¹.

Modern Business

With file sizes and volumes swelling, and with transfer time for such files exponentially increasing, completing timely transfers presents a growing challenge. Add in the prevailing nature of global file transfer across multiple networks and the need to optimize bandwidth, and high-speed file transfer is more critical than ever.

Why Do You Need High-Speed Data Transfer?

Does your business need to execute faster? Need to be quicker to market, improve customer satisfaction, make data-driven decisions faster, and/or optimize business processes? With your files getting larger and response cycle time expectations shortening, you need to move your data faster. Consider Cleo Jetsonic if your organization must:

- Manage file transfers with data growth projected to rise 50% year-over-year.
- Meet stringent SLAs — even though file velocity, volume, and veracity are increasing exponentially.
- Maximize network utilization as bandwidth increases.
- Automate file exchanges between businesses as well as internal systems with complete auditability.
- Move data between data centers that are geographically distributed.
- Address security and speed and still deliver ease of use.

Comprehensive Enterprise Solution

While transfer speed is a key component, Cleo Jetsonic is built on Cleo's proven secure data integration platform and allows you to monitor and track performance metrics from both an IT and a business perspective, as well as act on data via reports and dashboards based on your business. Integrating Cleo's highly secure and easy-to-use solutions with the fastest transfer technology on the market for an extreme file transmission solution unlike any other.

Benefits	Cleo Jetsonic™
Ensure secure, reliable delivery of business-critical data	✓
Eliminate network-imposed speed limitations	✓
Transfer files securely without reconfiguring firewall settings	✓
SSL encryption secures data in motion	✓
Key-based authentication	✓
Data integrity checks	✓
Automatic check point restart	✓
Full audit trail of file transfer activity	✓
Advanced throttling settings	✓
Multiple OS support across platforms	✓
