## Manage Your Data Exchanges. Don't Let Them Manage You.

In a business environment that is full of mergers and acquisitions and technology consolidations, data management is critical. The need for an easy and manageable way to keep control becomes more and more apparent. Enterprise Managed file transfer is one of the easiest ways to get your data under control, ensuring it's secure while in transit – every step of the way. Cleo VLTrader provides security at the highest level while also providing visibility to transactions. Meet necessary compliance and regulatory standards, manage your data exchanges with 100% uptime, merge disparate systems to create a seamless flow of information, and position your enterprise for growth.

Cleo VLTrader allows you to manage your data exchanges through secure, multi-industry protocols. The increased security in Cleo VLTrader also resolves ad hoc communication issues, including large files or attachments containing sensitive information. Cleo VLTrader gives you visibility to support your secure communications. You'll know to where and to whom your company data is being sent, while meeting audit and reporting standards required for corporate communications.

Current practices of sending missioncritical data via email or FTP server are convenient, yet leave much to be desired in the realm of security. These unsecured and varying methods of communication put your data at risk.

# Integration and Growth are Easy

Efficiency and growth are key concerns to businesses in a global market. Cleo VLTrader's flexibility allows you to easily integrate with back-end systems like EDI translators and databases, or application-to-application – migrating those legacy systems into a secure and automated file transfer system. This management of internal and external communications creates a seamless workflow with greater reliability. VLStat provides real-time visibility to all transfers and data exchanges taking place – creating efficiency like never before and resulting in avoidance of fines due to SLAs, payment delays, and performance gaps.

Growth is easy with more than 800 preconfigured connections. Cleo VLTrader enables you to on-board new partners quickly and securely – faster than ever before. Not only will you have more control over your trading partners you'll be able to provide them with tools that make it advantageous to do business with you. Partner access can be given through VLPortal – a Web Portal that requires no investment on the part of your trading partner and makes doing business with you an easy decision. Easily customized, VLPortal can be accessed from anywhere, representing your brand and ensuring the data you receive is managed from start to finish. Securely. Reliably. Quickly.

When more control is desired, Cleo VLTrader's Community Management functionality is just as easy. Your entire partner network will benefit from increased efficiencies, increased reliability, elimination of downtime, increased security, and minimized risk, all while expanding your opportunity for growth and meeting the governance and regulation that your business demands. Cleo VLTrader is easy to roll out, easy to manage, and helps you reduce additional costs.
